

PIX Belt Profile Gauge

TPUPUZZZZ003

PIX Belt Profile Gauge is a simple tool to determine the Belt section If the Belt marking or the printed label is not visible. Insert the Belt in the profile, which is made on Angle Gauge / Belt Profile Gauge for deciding the exact belt profile. This is a sole template which can be used to judge the cross-sectional dimensions (Top width, thickness & included angle) of all wrapped belts for profiles made on the gauge. It is a light-weighted, handy stencil, easy to understand and ensures effortless use.
